

ALK Quantitative Control

Cell line controls for immunohistochemistry and in situ hybridization.

Research Use Only

Product Code	Product Description
CC-BRS2014	2 Slide Pack
CC-BRS2015	5 Slide Pack
CC-BRS2016	X1 Cell microarray block

Application

This product is suitable for use in immunohistochemistry and in situ hybridization.

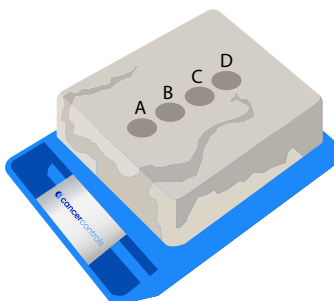

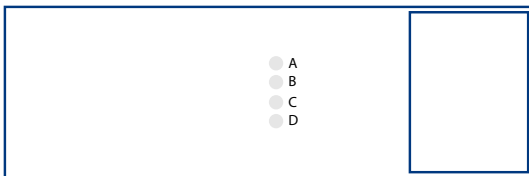

Materials

Four formalin fixed paraffin embedded cell lines.

Cell line A: Breast adenocarcinoma
 Cell line B: Glioblastoma
 Cell line C: Lung adenocarcinoma
 Cell line D: Anaplastic large cell lymphoma

Cells are fixed in 10% neutral buffered formalin and paraffin wax embedded.

Sections are cut at 4µm, mounted on positively charged slides and baked overnight at 37°C. Cell microarrays (CMA) contain cores that are 1.5-2mm in diameter and 3-3.5mm in length. It is possible to obtain up to 400 sections depending on thickness and batch cutting.

Expression Profile

Cell Line	IHC for ALK-EML4 (Lung)	IHC for ALK-NPM (Lymphoma)	FISH for ALK
A	Negative	Negative	Negative
B	Low	Negative	Negative
C	High	Mid	Positive
D	High	High	Positive

Storage and Handling

Store at 2-8°C. Do not freeze (for expiration date please see the product label)

Warnings and Precautions

1. The product is intended for research use only.
2. It is the responsibility of the end user to determine suitability with their reagents and procedures within their laboratory.
3. Do not use after expiration date printed on product labels. The user must validate any storage conditions other than those specified in the package insert.
